

Work smart and make real connections in a snap with a unique online teleconferencing platform

▶ Good things happen when great minds come together. But what if you can't get everyone in the same state, let alone the same room? The costs of business travel make teleconferencing essential in today's business climate.

Elluminate can provide you with a solution to your communication needs with its online, real-time conferencing

system that's more simple to use and significantly more affordable than many of the overpriced web-conferencing products on the market. Plug into a convenient way to promote and improve your business with this easy online service.

Why Elluminate?

It Saves You Time and Money: Elluminate can make your meetings and training sessions more effective and productive with:

Two-way Audio (Voice-Over IP):

Crystal-clear audio over the Internet without teleconferencing. Use your computer's built-in microphone and speakers or plug in an external headset and mic.

Bandwidth Efficiency: Collaborate in real time, regardless of Internet connection speeds, knowing that everyone sees and hears the same thing at the same time.

Sharing Tools: Share PowerPoint presentations, drawing tools, or anything on your desktop with participants. You or your participants can edit or add content via moderator-grantable mouse controls.

Recordings: Save the audio and video of a meeting or training session as a file for viewing later.

Direct Messaging: Instant public and private messages to one participant, the entire group, or a selected group of participants.

Quiz Manager: Allows the moderator to conduct interactive quizzes and surveys and collect results.
